Since its very beginnings, HERBELIN has set itself apart with its high standards, independence, humanity and elegance, values that have made it an exceptional force in the French watch market for three generations.

Remaining faithful to the Jura mountains of its origins, the company is located in Charquemont, a few kilometres from the Swiss border.

The decision to maintain production on French soil has always been an obvious one, a perpetual declaration of love and respect for French watchmaking expertise.

Still today, it drives the creative independence and superior quality of the HERBELIN brand.

*\*Contemporary Watchmaking since 1947*

movement that give traditional French  
watchmaking its prestige. Brimming with

brand creates irresistibly elegant timepieces  
with irreproachable mechanisms.

## NEWPORT

NEWPORT HERITAGE encompasses the 70's inspired cushion-shaped case design and the red large Day/Date aperture that is reminiscent of a compass used for navigation. ## ÉQUINOXE

The Équinoxe collection from Michel Herbelin is inspired by an Equinox, (or Equinoxe in French). During this time night and day are nearly exactly the same length all over the world. The Equinoxe range of ladies watches takes its inspiration from this period of the earth's movement. The simple yin and yang style extend out of the case and wrap themselves back creating a balance that is visually pleasing. The design effect is striking yet simple with curved lines for a touch of modernity. Swiss Quartz movement Ronda

## 5<sup>TH</sup> AVENUE

Fifth Avenue watches are utterly feminine and play a subtle hand. The collection turns heads with a minimalist geometric designed steel case measuring 25.5mm x 19mm with a crown fitted at 12 o'clock on an open worked case.

Like Michel Herbelin, these timepieces are true to French Design.
