CATALOGUE 2022

# *The brand's history*

1947

## THE BEGINNING OF A GREAT STORY

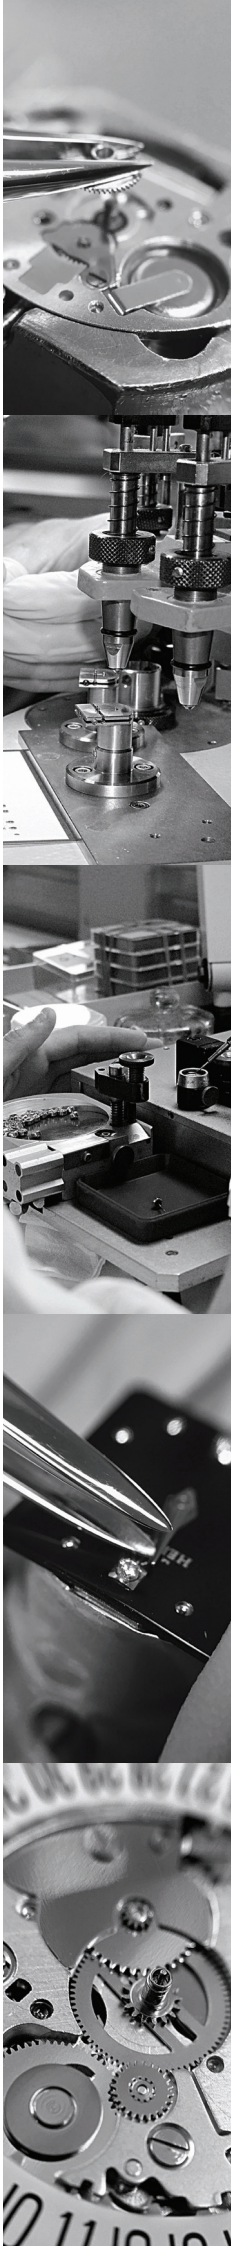

The story begins in the cradle of French watchmaking, in Charquemont, a village in the heart of the Jura mountains. After spending a few years in a local watchmaking factory, the quality of whose products did not meet his requirements, and with the ambition of restoring the traditional French watchmaking industry to its former glory. He then boldly embarked on a new adventure... his adventure. Michel HERBELIN opened his own workshop and created his first collection of watches at the age of 26.

1980

## A FAMILY SUCCESSION

Michel Herbelin's job was to dress the time with passion for over 40 years. It was only natural that he should pass on his passion for watchmaking to his two sons, Jean-Claude and Pierre-Michel, who joined him in his career. At this time, quartz was making its appearance. While some see it as a sign of the decline of French watchmaking, for Michel Herbelin and his sons, it is on the contrary a wonderful opportunity to free the creativity of designers and take up the challenges of future generations. The transmission of know-how is an essential value for Michel HERBELIN. Today, two of the founder's grandchildren Maxime and Mathieu Herbelin, are in turn contributing to the success of the family business. Their creativity and expertise give new impetus to the brand.

2018

## IN CONSTANT MOTION SINCE 1947

For over 70 years Michel Herbelin has prospered while remaining true to its original values. All the watches are designed, assembled by hand and checked in the brand's workshops in the Franche-Comté region, with the same philosophy: to create timepieces designed to last while respecting the craftsmanship, while adding the elegance of the French.

Since 1947, Michel HERBELIN has been able to adapt to changes and trends, while respecting its DNA.

2020

## PERPETUATING THE MOTION IN THE TIME

In 2020, Pierre-Michel Herbelin handed over to his young partners in whom he has full confidence to continue the family adventure: Maxime and Mathieu Herbelin, grandsons of the founder, partnered with Cédric Gomez-Montiel and Benjamin Theurillat.

Together, an expert team, they are ready to take up the challenge of growing this historic flagship brand into the future!

# *The brand's know-how*

## A MICHEL HERBELIN WATCH - TEN KEY CHAPTERS, ONE DESIRE : CREATE TO LAST

- CHAPTER 1 : INSPIRATION

... Behind every creation, there is inspiration and imagination, a knowing blend of architecture and fashion. Freehand drawings around a table, papers that are rubbed out, crumpled up and scribbled on. Doubts, convictions and anecdotes. Intuitive visions, ideas gleaned from Michel the founder's archives...

- CHAPTER 2 : CREATION

Once the designer has defined the scope of their inspiration, they must find the creative idea that best expresses that territory. This idea can be expressed in words, or it can take the form of a concrete freehand drawing.

- CHAPTER 3 : DESIGN

The designer must study the smallest details, define the proportions and give an idea of the volume, colours and materials. The watch begins to come to life.

- CHAPTER 4 : THE TECHNICAL DRAWING

The calibre-designer, the true architect of the watch, produces the technical drawings while faithfully following the specifications.

- CHAPTER 5 : THE PROTOTYPE

The artisan watchmaker first inspects then assembles the components by hand to build the prototype of the new model. It will then be modified several times to meet the aesthetic and technical criteria defined by the designers. Only when the prototype is deemed to be impeccable can production be launched.

- CHAPTER 6 : ADJUSTMENT AND INSPECTION

Before assembling and starting the watch, each component is painstakingly inspected and adjusted to ensure that they work perfectly.

- CHAPTER 7 : ASSEMBLY AND STARTING THE WATCH

At every moment - from placing the dial on the movement to casing-up and hand-fitting - each watch is painstakingly inspected to ensure perfect operation. The watch is started and comes to life - a magical moment.

- CHAPTER 8 : CHECKING THE WATER-RESISTANCE

Each watch is individually tested. The tests are carried out under pressurised and depressurised conditions, for values that correspond to depths of 30 to 1000 metres.

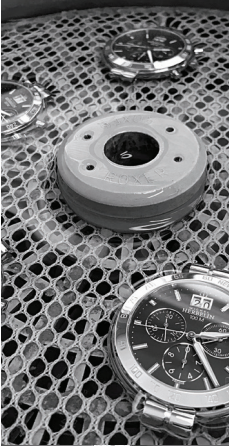

- CHAPTER 9 : ATTACHING THE STRAP

This is the final touch, the moment when the watch really comes into its own. Leather, metal, beads : to each watch its own style and personality.

- CHAPTER 10 : OPERATIONAL TESTS

Every watch is examined by the expert hands and watchful eyes of the artisan watchmakers of the production workshop to check its technical and aesthetic characteristics. Nothing is left to chance.

*Helpful crew member for any regatta, these Limited Edition REGATTA CHRONOGRAPH models are equipped with a regatta countdown function. Useful for setting a race start timing within a predefined period of time.*

*The models are made for Racing, and powered by a Swiss-made Sellita automatic mechanical movement exclusive to Michel Herbelin, oscillating at 28,800 vibrations per hour and incorporating 25 jewels, the Newport Regatta offers a minimum of a 42-hour power reserve. Its transparent case back reveals a Michel Herbelin engraved oscillating weight.*

*They are adorned with a Newport blue strap in high-performance FKM elastomer and features a deployment clasp steel securing buckle. Specially designed to fit the contours of the watch, it is an extremely resistant and high performance material.*

*Newport DNA - the strap's central lugs, porthole-style bezel adorned with five screws modelled on yacht winches, ship's wheel stamped on the crown, hands in the shape of floating pavilions and hour markers inspired by a boat's hull - enhances the technicality of the range and truly immerses it in the world of competitive sports.*

*NEWPORT HÉRITAGE DIVER is inspired by the diving watches designed by Michel Herbelin in the Seventies, it remains faithful to the maritime hallmarks characteristic of the Newport. As well as embracing sporty French chic, this automatic timepiece is water-resistant to 300 metres and made to be immersed in deep waters with gusto.*

*The 316L stainless steel case (42 mm in diameter) is cushion-shaped, polished apart from the edges which are brushed, it is crowned by a polished ceramic unidirectional rotating bezel. By way of contrast, the white graduated 60-minute scale – complete with indicator triangle with white luminescent coating – ensures optimum visibility during dives and decompression. The 120 bezel clicks make it easy to handle, even with gloves on, a detail that differentiates top-of-the-range diving watches.*

*Protected by a double-sided domed sapphire glass, ensuring optimal visibility essential for diving, it features oversized hands and hour markers with luminescent coating for excellent readability in the dark. Encircled by a clearly marked minute track and comprising a black on white double day/date aperture for ease of reading, the timepiece is clearly set out by slender white intersecting lines.*

## TECHNICAL SPECIFICATIONS

Movement is a Swiss automatic, Sellita SW220-1 calibre with 26 jewels, beating at 28,800 vibrations per hour with a 38-hour power reserve.  
Michel Herbelin Héritage Diver benefits from ancestral French watchmaking tradition passed down from father to son since 1947.

*NEWPORT HERITAGE 316L stainless steel cushion-shaped case design is complemented by polished and brushed surfaces, enhancing the Newport blue sunray dial.*

*The 70s inspired large Day/Date aperture at 3 o'clock is reminiscent of a compass used for navigation. Slender red intersecting lines echoing the four compass points accurately coordinate the information. Located on the circular brushed flange is a clearly marked minute track with imposing faceted hour markers. Steel coloured with white luminescent coating, the latter match the hour and minute hands, powered by a red central seconds hand. Protected by a double-sided domed sapphire glass, the combination offers optimal readability accentuated by contrasting colours.*

*The design still shows the iconic features of the Newport collection, thanks to the strap's central lugs, the porthole-style bezel adorned with five screws modelled on sailing boats windlasses and the ship's wheel stamped on the crown.*

*Water-resistant to 100 metres, the Newport Héritage is paired with a strap that is rounded in the middle and made from a highly resistant technical textile used for boat rigging. Also available on a mesh strap in satin-finish steel.*

*Michel Herbelin Newport is a sleek design has instantly recognisable codes that made this iconic collection such a success: the strap's central lugs, the porthole-style bezel, and the ship's wheel stamped on the crown. Presenting a stainless steel case – polished and brushed to accentuate its three-faceted cut – this is inspired by the streamlined architecture of stealth ships. Beneath a bezel punctuated by five screws modelled on yacht winches, the various dials in the collection spotlights the model's seafaring spirit.*

*The strength of design ensures Newport is the iconic collection of Michel HERBELIN*

*The Equinox collection from Michel Herbelin is inspired by an Equinox, (or Equinoxe in French).*

*During this time night and day are nearly exactly the same length all over the world.*

*The Equinoxe range of ladies watches takes its inspiration from this period of the earth's movement. The simple yin and yang style extend out of the case and wrap themselves back creating a balance that is visually pleasing.*

*The design effect is striking yet simple with curved lines for a touch of modernity.*

*Fifth Avenue watches are utterly feminine and play a subtle hand.  
The collection turns heads with a minimalist geometric designed steel case measuring  
25.5mm x 19mm with a crown fitted at 12 o'clock on an open worked case.  
Like Michel Herbelin, these timepieces are true to French Design.*

# ANTARÈS

## EXCEPTION & CRÉATIVITÉ

*come together in the Antarès watch, an iconic model with interchangeable straps, crafted with precision in France at our workshops in Charquemont.*

*Featuring a patented system to change straps, available in leather or metal, the subtle luxury of the design lends itself to all variations of style. Born to challenge the ephemeral, the ANTARES collection embodies the ongoing pursuit of aesthetic and technical perfection that drives the family-owned Maison Michel Herbelin.*
